Description			
Make a general script (or scripts) that can print summary info from the OnMon headers. Something like:			
<code>OnMonHeaderSummary.sh /nova/data/nearline-OnMon/FarDet/S13-09-17/*/*FDNL-onmon*-{000118,000119}*.root</code>			
And the output would look something like:			
<code>run # subrun # partition # Nevents # start time: XXX end time: YYY</code>			
<code>run # subrun # partition # Nevents # start time: XXX end time: YYY</code>			
<code>run # subrun # partition # Nevents # start time: XXX end time: YYY</code>
