

## GlideinWMS - Bug #5414

### Multiple proxies not being handled correctly - numbers too low

02/11/2014 01:32 PM - Igor Sfiligoi

<b>Status:</b> New	<b>Start date:</b> 02/11/2014
<b>Priority:</b> Low	<b>Due date:</b>

<b>Occurs In:</b>	
<b>Description</b> CMS just found out that in v3, using multiple proxies results in all numbers being divided by the number of proxies.  This includes at least max_idle and max_running.  This is very different than in v2, where those numbers went whole to each proxy.  This is definitely a problem for max_running, since there is no guarantee that all proxies will get the same amount out of a site. I believe CMS is hurting due to this.  Not sure how problematic is the max_idle... it definitely was a surprise for CMS, but at least it can be controlled to a certain degree at the FE config level.
