

Elog - Bug #5441

Un-refining by subject doesn't seem to work

02/14/2014 11:48 AM - Phil Adamson

Status:	Closed	Start date:	02/14/2014
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
Refining by subject works, but un-refining by subject doesn't.			
Specifically:			
Refine by Recycler			
Refine by RR 12 batch slip-stacking study.			
(so far, so good.)			
Refine by Operations			
(realize that I don't see new entries, because I have a subject selected)			
Un-refine by RR 12 batch slip stacking			
(new entries fail to appear)			
Subsequently de-selecting a re-selecting Operations log makes that log visible.

Is duplicate of Elog - Bug #5026: Subject selected but not refining		Closed	12/02/2013

History

#1 - 02/14/2014 12:21 PM - Kyle Hazelwood

- Status changed from New to Assigned

I've seen this and I think I have a fix in the test server now but I want to test it some more before releasing (The fix required changing the main DB query for retrieving entries). The way to get around the bug for now is to refine/unrefine by any non subject to reset the last modified date calculation.

#2 - 05/17/2014 06:10 PM - Kyle Hazelwood

- Status changed from Assigned to Feedback

I removed the date check caching scheme in the latest release. The caching was not saving a noticable amount of time and was not working correctly. If page load time becomes a problem I'll have to revert. I'm working on a different caching scheme.
