

Node Registration V2 - Bug #5460

EquipDB 'System is in DHCP Networking' flag not set by SNOW personal owned device registration

02/16/2014 12:56 PM - Timothy Zingelman

Status:	New	Start date:	02/16/2014
Priority:	High	Due date:	
Assignee:	Shirley Jones	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
When I register a personal device using MISCOMP web forms, the 'System is in DHCP Networking' flag gets set for the newly created device. When I use the SNOW form to do the same, this flag is not set. It may be that this flag is not important? If it can be confirmed the flag is really not used anymore, then this bug should be rejected.			

History

#1 - 02/17/2014 03:54 PM - Michael Baker

Sent an email to Krysia and Shirley to confirm.

#2 - 02/18/2014 02:10 PM - James Fromm

- Assignee set to Shirley Jones

#3 - 02/18/2014 02:11 PM - James Fromm

We should always set this flag. Shirley will change in EquipDB but not pass it to ServiceNow.

#4 - 02/18/2014 02:18 PM - James Fromm

- Priority changed from Urgent to High

Marking as High as this does not have to be fixed when we install just the plumbing.
