Occurs In:		Experiment:	-
Scope:	Internal	SSI Package:	art

Description

For the filename format specifiers %r, %R, %s and %S, when used in their modified forms (nnX), substitution fails to occur when no events are seen.

History

#1 - 02/19/2014 05:51 PM - Christopher Green

- Subject changed from @PostCloseFileRenamer@ can fail to substitute where format modifiers are used and no events are seen. to PostCloseFileRenamer can fail to substitute where format modifiers are used and no events are seen.

#2 - 02/19/2014 05:59 PM - Christopher Green

- Status changed from New to Resolved

- % Done changed from 0 to 100

Test and fix committed with commit:eb171e2.

#3 - 03/03/2014 11:44 AM - Lynn Garren

- Status changed from Resolved to Closed
