Occurs In:	v0.2		

Description

The 0.1.4 release is coded to put dropbox files in /scratch/dropbox by default. This behavior can be changed by changing dropbox_path_root = /scratch/dropbox to something else in the jobsub.ini file, but the default directory is not created by the rpm and changing the default is not documented anywhere.

Change the rpm to create the default directory
Document dropbox_path_root behavior for operations group
