

## Recocert Framework - Bug #566

### Checklbns rerun gives bad status to good runs

07/08/2010 04:59 PM - Marc Mengel

<b>Status:</b>	Accepted	<b>Start date:</b>	07/08/2010
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Marc Mengel	<b>% Done:</b>	90%
<b>Category:</b>		<b>Estimated time:</b>	0.50 hour
<b>Target version:</b>		<b>Spent time:</b>	0.00 hour
<b>Description</b>			
The code can get confused and try to run checklbns again, after it's already been run and the files moved to good_lbns. We need to only run checklbns on datasets that are actually in the output directory.			

#### History

##### #1 - 07/08/2010 05:07 PM - Marc Mengel

Now we compute the intersection of the list of runs in the output area and the jobs that look like we should check their LBNS, and that's what we actually check for LBNS. See [r4](#), [r6](#) and [r7](#)
