JobSub - Bug #5769

Milestone # 6025 (Closed): Release JobSub v0.3

Milestone # 6027 (Closed): Improve output sandbox handling with fetchlog in client and server

Server should create sandbox file with unique name

Description

Currently when a fetchlog command is issued, the server creates a zip file with the name <jobid>.zip. If there are multiple invocations of the fetchlog for same jobid, it could lead to corrupt zip files. Zip files should have unique name

History

#1 - 04/25/2014 09:54 AM - Parag Mhashilkar

- Parent task set to #6027

#2 - 04/28/2014 01:40 PM - Dennis Box

- Status changed from New to Closed

On server side, zip file now has timestamp with microsecond precision appended to file name. User could now try to corrupt zip file by issuing fetchlog command twice in two seperate windows, but they would have to be deliberately trying to do this and still get lucky with the timing.

#3 - 04/30/2014 08:33 AM - Parag Mhashilkar

- Due date set to 04/29/2014

- % Done changed from 0 to 100
