Description

Brian Tice:

Add ability to break shifts into day-sized chunks βmaybe hard but I think important

o Occasional a shift is broken in irregular fashion. For example, I take a weeklong shift but need somebody to cover for me on Tuesday. It is very important that operations and shift leaders know that this is happening.

o It would take far too much to configure the shift period to have 7 day-long shifts for every single week. We just want this one to be broken into 6+1 or even seven 1-day shifts.

(this request needs clarification)

A note attached to the shift and visible in the calendar view would be good way to implement this.
