Target version:	v2_00_00			
Experiment:				

Description

We should have reusable configuration management patterns, libraries, and tools in artdaq.

This may build on the reuse of the NOvA configuration management system for the LBNE 35-ton detector.

History

#1 - 01/13/2017 04:35 PM - Eric Flumerfelt

- *Category set to Additional Functionality*

- *Status changed from New to Closed*

- *Target version changed from 577 to v2_00_00*

Closing as this is covered by DAQInterface, artdaq-database, and artdaq-node-server.
