

MINERvA Software Infrastructure - Review Request #6138

Review Request # 6135 (New): Data Management Workflow Umbrella Task

Unify calibration scripts framework for long term maintainability and dCache compatability

05/02/2014 10:28 AM - Gabriel Perdue

Status:	Closed	Start date:	05/02/2014
Priority:	Normal	Due date:	09/02/2014
Assignee:	Daniel Ruterbories	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
Modify the calibration scripts as follows: a. Unify job scripts for calibration i. Reduce number and language flavors of scripts b. Use common methodologies for editing/creating options files c. Factorize the job submission and production layers of scripting. The job submission pieces should then be "productized".
