

GlideinWMS - Feature #6319

Propagate and/or validate factory attributes from running glideins

05/22/2014 10:34 AM - Igor Sfiligoi

Target version: v3_x	Spent time: 0.00 hour
Stakeholders:	
Description There is currently no validation of the attributes that a factory entry advertises. It is up to a human to spot any errors and correct them. Similarly, there is no automated way to infer properties for a Grid site, requiring manual labor to extract the relevant information and put them in the configuration. The factory should instead monitor the started glideins, and extract the relevant information autonomously.
