<b>Description</b>			
<p>Add a plot to the nearline webpage that shows if we are keeping up with processing (like Dominick's watchdog plots.) This could be done in a few different ways.</p> <ol style="list-style-type: none"><li>1) It could show runs from database, OnMon files on disk, and Ana files on disk and be a script that runs every 6 hours at FNAL.</li><li>2) It could show raw files on disk, OnMon files on disk, and Ana files on disk and be a script that runs every 6 hours on the nearline processing machines.</li></ol>
