

Synergia2 - Bug #6395

The particle at with ID 0.0 will not be cut even if it doesn't fit through an aperture if there are any other particles in the bunch

06/02/2014 11:08 AM - Eric Stern

Status:	Remission	Start date:	06/02/2014
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
The particle with ID 0 at 0.0 will still appear in the turn_tracks file after it was cut by an aperture.			

History

#1 - 06/03/2014 09:21 AM - Eric Stern

- Status changed from New to Remission

This was a confusion of Issue #8399 and an action taken when particles are cut, their particle IDs are negated in the bulk tracks file, however you can't tell when the particle ID==0.0. If the particle is cut, it is actually removed from the particle dump files.
