Target version:	
Description	
After setting up novasoft and getting a valid voms certificate samweb2xrootd still fails to open a file in development (confirmed) and S14-06-09 (reported), giving the following error:	
Initiating request to open file root://fndca1.fnal.gov:1094//pnfs/fnal.gov/usr/nova/production/reconstruction/S14-04-14/fd/000148/14810//fardet_r00014810_s16_t00_S14-04-14_v1_data.reco.root %MSG-s ArtException: nova 18-Jun-2014 14:56:50 CDT JobSetup cet::exception caught in art ---- FileOpenError BEGIN ---- FatalRootError BEGIN Fatal Root Error: @SUB=TNetXNGFile::Init cannot stat the file root://fndca1.fnal.gov//pnfs/fnal.gov/usr/nova/production/reconstruction/S14-04-14/fd/000148/14810/fardet_r00014810_s16_t00_S14-04-14_v1_data.reco.root ---- FatalRootError END RootInputFileSequence::initFile(): Input file root://fndca1.fnal.gov:1094//pnfs/fnal.gov/usr/nova/production/reconstruction/S14-04-14/fd/000148/14810//fardet_r00014810_s16_t00_S14-04-14_v1_data.reco.root was not found or could not be opened. ---- FileOpenError END %MSG Art has completed and will exit with status 20.	

History

#1 - 06/27/2014 01:09 PM - Christopher Backhouse

This is art issue 6558 <https://cdcv.s.fnal.gov/redmine/issues/6558>

#2 - 07/27/2014 09:37 AM - Kanika Sachdev

Artists have made patches for us that fix this issue. Since we have moved to root v5_34_18d and xrootd v3_3_4a, samweb2xrootd opens files with a problem.

#3 - 07/28/2014 01:43 PM - Gavin Davies

- Status changed from New to Resolved

Resolved so can then close it

#4 - 07/28/2014 01:43 PM - Gavin Davies

- Status changed from Resolved to Closed
