

Fermi Redmine - Feature #6771

Report username is subject of commit messages

08/10/2014 06:17 PM - Kanika Sachdev

Status:	New	Start date:	08/10/2014
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
Would it be possible to report the username of the person making the commit in the subject line of the commit mails? Currently only the revision number and directory that is changed are reported. I speak of SVN since that's what NOvA uses.			
Thanks! Kanika

There are a couple of ways to deal with this. Currently your commit-hook runs:

```
REPOS="$1"  
REV="$2"
```

```
/usr/local/bin/commit-email.pl "$REPOS" "$REV" --from p-novaart@cdcvs.fnal.gov -h fnal.gov --diff y NOVSVNCOMMIT@fnal.gov
```

- 1) If you simply remove the '--from p-novaart@cdcvs.fnal.gov' bit, the From address will become the author@fnal.gov.
- 2) you could add/change a few lines:

```
REPOS="$1"  
REV="$2"  
AUTHOR=`svn log -r $REV file://$REPOS | grep "^r$REV" | cut -d '|' -f 2`
```

```
/usr/local/bin/commit-email.pl "$REPOS" "$REV" -s "commit: $AUTHOR $REPOS" --from p-novaart@cdcvs.fnal.gov -h fnal.gov --diff y NOVSVNCOMMIT@fnal.gov
```

and you would then have the author in the subject line, as requested.
