Target version:	v3_2_7	Spent time:	0.00 hour
First Occurred:	v3_0	Stakeholders:	OSG, CMS
Occurs In:			

Description

Setting proxy_url in the factory doesn't do anything on the job side. From Jeff:

Hello glideinWMS,

In working with one site who requested we start using their squid proxy, we've discovered that the proxy_url entry attribute is broken! Please see the following, in our factory config:

```
<entry name="CMS_T3_US_PuertoRico_grid0" auth_method="grid_proxy" comment="Added 2012-12-12 on admin's request --Alex" enabled="True" gatekeeper="cms-grid0.hep.uprm.edu:2119/jobmanager-condor" gridtype="gt5" proxy_url="OSG" rsl="(queue=default)(jobtype=single)" schedd_name="schedd_glideins4@factory-1.t2.ucsd.edu" trust_domain="grid" verbosity="std" work_dir="Condor">
```

note we have proxy_url="OSG" set. I even see it propagate to the following:

```
cat entry_CMS_T3_US_PuertoRico_grid0/job.condor | grep -i proxyurl
+GlideinProxyURL = "OSG"
```

```
cat entry_CMS_T3_US_PuertoRico_grid0/job.descript | grep -i proxyurl
ProxyURL      OSG
```

Yet please see the attached logs. In the .out you will see:

```
proxy_url      = 'None'
```

and .err:

```
PROXY_URL None
```

```
GLIDEIN_Proxy_URL="None"
```
