NOvA DAQ - Bug #6773

novadaq redmine repository viewer broken

08/11/2014 06:05 AM - Alec Habig

Status:	New		**Start date:**	08/11/2014
Priority:	Normal		**Due date:**

Target version:			**Spent time:**	0.00 hour

Description

The "Repository" section of this redmine project is no longer showing recent (newer than ~6 months or so) changes. Recently changed files have their age properly calculated: but one cannot see the actual current files or their revision number, and cannot then make use of the superb clicky interface for diffs to see what's changed when.

History

#1 - 09/22/2014 06:35 AM - Alec Habig

Seems fixed now. Did it heal itself, or was a magic wand waved? If so, what is the solution?

#2 - 11/25/2014 10:02 AM - Alec Habig

Nope, still broken: just tried to use it to look at diffs to NovaGlobalTrigger.cc. While the directory view shows it correctly as being last updated 12 days ago, clicking on the file last shows an update from a year ago July. Not so useful.

Someone, please, anyone: to whom to I talk to get clues as to fixing this? If it's just broken and we shouldn't be using it, it needs removed from redmine so we don't try and flail.
