Target version:		Spent time:	0.00 hour
Description			
Some of the browser queries can potentially return a large result set. So add the ability to limit the results to a reasonable number, and add paging through them.			

History

#1 - 12/04/2014 11:02 AM - Robert Illingworth

- Status changed from New to Assigned

[5257e3d](#) adds limit and after_id parameters to the project list query. The latter will return rows where the project_id is greater than the given value; this is more efficient than using offset as the DB can jump over the indexed column rather than having to count through and discard so many rows. Using either of these parameter also add an "order by project_id" clause to the query, so it will return consistent results.

#2 - 02/13/2015 12:37 PM - Robert Illingworth

- Target version changed from 2.2 to 2.3

#3 - 07/10/2015 05:26 PM - Robert Illingworth

- Target version deleted (2.3)
