- Status changed from Assigned to Resolved

- % Done changed from 0 to 100

But you may just want the "Version" functionality which exists already -- you can create a version by going to your projects Settings tab, Versions sub-tab, and creating a Version; and then you can associate a date with it, and associate various tracker items with that "Target version".

As to removing tracker types, you can uncheck them in the Settings/Information tab to turn them off per project.
