

Electronic Collaboration Logbook - Bug #7959

API fails on unsanitized XML

02/27/2015 12:43 AM - Kyle Hazelwood

Status:	Resolved	Start date:	02/27/2015
Priority:	Normal	Due date:	
Assignee:	Vladimir Podstavkov	% Done:	100%
Category:		Estimated time:	0.50 hour
Target version:		Spent time:	0.00 hour
Experiment:	-		

Description

Some entries can not be retrieved via the XML API because they contain XML special characters that are not sanitized before the response. A quick search using the NML elog reveals ~60 entries out of ~7700 that are not properly sanitized for XML.

Example:

http://dbweb4.fnal.gov:8080/ECL/nml/E/xml_get?e=5376
