

uBooNE DAQ - Bug #8055

Supernova Compression

03/11/2015 12:10 AM - Eric Church

Status:	New	Start date:	03/11/2015
Priority:	Normal	Due date:	05/29/2015
Assignee:	Kazuhiro Terao	% Done:	10%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
component:	base		
Description			
Need the FPGA coding that implements the trailing variance x50 compression as presented at various DAQ meetings. Readback must verify that the data is able to be parsed.
