

CAMAC - Feature #8126

C1151 modules in beamline front-ends should support array devices.

03/19/2015 11:06 AM - Richard Neswold

Status:	Assigned	Start date:	03/19/2015
Priority:	Normal	Due date:	
Assignee:	Richard Neswold	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
Each channel in the C1151 module is treated as a separate device, in the driver. Brian Hendricks and Wally Kissel requested that the driver also support an array device interface.
