Description

Hello,

In art v1_13_01 I get printouts

```
%MSG-i FastCloning: RootOutput:dsout@Construction 27-Mar-2015 14:45:15 CDT ModuleConstruction
Fast cloning user configuration: true
%MSG
%MSG-w FastCloning: RootOutput:dsout@Construction 27-Mar-2015 14:45:15 CDT ModuleConstruction
Fast cloning deactivated due to presence of event selection configuration.
%MSG
```

The statement about "user configuration" is not correct: my fcl file does not say anything about FastCloning. There is no reason to give warnings here. The fragment in question is

```
dsout : {
  module_type : RootOutput
  SelectEvents: { SelectEvents: ["trigdsregion"] }
  outputCommands: [ "drop *_*",
    "keep mu2e::GenParticles_*_*_*",
    "keep mu2e::GenEventCount_*_*_*",
    "keep mu2e::StatusG4_*_*_*",
    "keep dsRegionFilter*",
    "keep _compressPVdsRegion_*"
  ]
  fileName : "data_g4s1_dsregion.art"
}
```

We can certainly remove the possibly-confusing word, "user" from the message, but we believe that printing this message unconditionally is the behavior that was requested as part of issue [#6402](#).
