

NuSoft/NuTools - Bug #8208

GENIEHelper flux file pattern .

03/31/2015 09:01 AM - Herbert Greenlee

Status:	Closed	Start date:	03/31/2015
Priority:	Normal	Due date:	
Assignee:	Robert Hatcher	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
The GENIDHelper flux file pattern (parameter FluxFiles) allows the matched filename to contain arbitrary characters after the matched pattern, rather than requiring the file name to end (in RE terms, missing terminating "\$"). This happens in ifdh mode. Not sure if it also happens in direct mode.			

History

#1 - 05/23/2018 12:00 PM - Robert Hatcher

- Status changed from *New* to *Resolved*
- Assignee set to *Robert Hatcher*

I believe this was fixed some time ago. Marking it "resolved" ... if there's evidence it's still a problem feel free to re-open it.

#2 - 02/27/2019 12:12 PM - Robert Hatcher

- Status changed from *Resolved* to *Closed*

There have been no further reports. Marking this as closed
