

IF Data Handling Client Tools (ifdhc) - Bug #8281

aws s3 has no mkdir command

04/08/2015 02:25 PM - Dennis Box

Status:	Closed	Start date:	04/08/2015
Priority:	Normal	Due date:	
Assignee:	Dennis Box	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	v1_8_2	Spent time:	0.00 hour
Description			
I tried this:			
<pre>[dbox@novagpvm01 ~]\$ ifdh mkdir s3://ifdh_tests/dir_1/ usage: aws [options] <command> <subcommand> [parameters] aws: error: argument subcommand: Invalid choice, valid choices are:</pre>			
<pre>ls website cp mv rm sync mb rb Exception:mkdir failed at:Wed Apr 8 14:07:17 2015</pre>			
line 1821 of ifdh_cp.cc (on devel branch)			
<pre>if (use_s3) cmd << "aws s3 mkdir ";</pre>			
I tried 'aws s3 mb directory/subdirectory' and it worked, thats probably what needs to go here.			
Dennis			
An aside: I assume I can make and delete test buckets, and copy small files back and forth as part of testing. True? How much data can I move before I have used too much?
