

G4WebAppNG - Feature #8330

check input data on the edit test pages

04/13/2015 05:48 PM - Hans-Joachim Wenzel

Status:	Closed	Start date:	05/31/2015
Priority:	Normal	Due date:	
Assignee:	Rasheed Auguste	% Done:	100%
Category:		Estimated time:	8.00 hours
Target version:		Spent time:	8.00 hours
Description			
Add checking of the input on the edit pages. E.g. check that string length doesn't exceed the length of character fields in the database item. This should be done in a way that will be obvious to the user (e.g. length of the input field corresponds to the length of the character length in the database) If an database error should happen for any reason even after careful checking of the input values a message should be created to inform the user. Also a message should be displayed when the edit was successful.			

History

#1 - 05/27/2015 11:46 AM - Hans-Joachim Wenzel

- Assignee changed from Hans-Joachim Wenzel to Rasheed Auguste

#2 - 06/03/2015 03:43 PM - Rasheed Auguste

- % Done changed from 0 to 100

- Estimated time set to 8.00 h

Work Performed:

Input webpage with validation, created corresponding backup beans, and extended G4validation API to include classes for status, score, and type of test

#3 - 06/03/2015 03:45 PM - Rasheed Auguste

- Status changed from New to Resolved

#4 - 06/03/2015 03:46 PM - Rasheed Auguste

- Tracker changed from Bug to Feature

#5 - 12/08/2015 02:40 PM - Hans-Joachim Wenzel

- Status changed from Resolved to Closed

Add checking of the input on the edit pages. E.g. check that string length doesn't exceed the length of character fields in the database item.

If an database error should happen for any reason even after careful checking of the input values a message is created to create the user

A message is displayed when the edit was successful.
