

Recycler Tune Control Application (PA4208, R2) - Bug #8389

Tune setting should fail when any corrector reaches its current limit

04/21/2015 04:23 PM - Kyle Hazelwood

Status:	New	Start date:	04/21/2015
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	3.00 hours
Target version:		Spent time:	0.00 hour
Description			
<p>When the calculated corrector current exceeds 6.5A the individual corrector is clamped to 6.5A but the rest of tune setting goes out. The tune setting should fail if any of the correctors exceed their current limit.</p> <p>I need to check whether this is true for other portions of R2 and I2.</p>
