Target version:	v1_12_09	Co-Assignees:	
Experiment:	-		
Description			
At the moment, the bulk of the message facility configuration FHiCL is generated inside the artdaq code.			
It would be nice to allow individual experiments to specify additional message logger destination or other customizations.			

History

#1 - 05/04/2015 02:17 PM - Kurt Biery

- Status changed from New to Resolved

- % Done changed from 0 to 100

John modified pmt.rb to accept the path of a FHiCL snippet that would get included in the MsgFac configuration, and he modified configureMessageFacility.cc to make use of this file. This made use of an ARTDAQ_LOG_FHiCL env var.
