Description

The following issue maps to SNOW Request RITM0208561.

Opened by : Pawel Kryczynski, LarTPC.

"I'd like to ask if that's possible to make some of the e-log entries stay always on top of the list, regardless of their creation date? That would be really useful to find information about configuration /settings established during taking data. "

First reply and suggestion (Margherita):

Hi,

we don't have that feature now. As a suggestion, as option, you could use tags for example as "setting" or "configuration" and tag the entry accordingly. So you could search on the tag and even create a "saved search" so that it will be easy to identify those entries.

Hope this helps, thanks

So, if we do this, the user could create a "sticky " tag (in some way already suggested) and we could provide the option to show sticky tags first.

#2 - 01/29/2018 09:53 PM - Margherita Vittone Wiersma

- Status changed from New to Resolved

- Assignee set to Margherita Vittone Wiersma

This was done and made available in version 7.6 released in December 2016.
