

Offline Production Operations Service - Bug #8796

Condor jobs starting several times after, apparently, having completed

05/14/2015 12:43 PM - Paola Buitrago

Status:	New	Start date:	05/14/2015
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
Related SNOW incident: INC000000544058			
<p>This is a special rare case since, each time the jobs were started, they had the time to tell the sam projects they had completed so it looks like the followed regular ending path.</p>			
<p>Ken and Kevin explanation: It must have been 'network problems' because it all happened in a matter of 2 minutes (a job running in different nodes four times).</p>			
<p>Robert Illingworth: To know better, someone should check condor internal logs.</p>			
<p>Dennis Box: Joe Boyd would be right person to ask about this.</p>
