

Image Tool - Bug #8946

Defalut camera?

05/27/2015 09:04 AM - Chip Edstrom

Status:	New	Start date:	05/27/2015
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.01 hour
Description			
Image tool appears to pick the Virtual Cathode camera by default. It should not do this as we sometimes use the cameras apart from image tool for longer-term beam stability studies.			

History

This doesn't appear to be a reliable problem, only occasional so maybe image tool is having trouble seeing which camera is in use from time to time.
