<b>Description</b>			
<p>From version 1.8.0, Doxygen supports a "markdown" type of input. The documentation written in this mode is easier to read in the source code since it is a bit more visual, and in my opinion is also easier to write in the first place.</p> <p>I noticed that the version used for <a href="#">LArSoft documentation</a> uses the earlier version 1.7.5.1. Once Doxygen is updated, markdown is enabled by default.</p>			

#### History

##### #1 - 08/11/2015 10:19 AM - Lynn Garren

- Status changed from New to Accepted
- Priority changed from Normal to Low

We will need to build and distribute a newer release of doxygen in order to do this.

##### #2 - 03/22/2016 10:15 AM - Lynn Garren

- Status changed from Accepted to Resolved
- Assignee set to Lynn Garren
- % Done changed from 0 to 100
- Estimated time set to 2.00 h

The doxygen build script runs in ~larsoft/doxygen on one of the gpvm machines. It uses a copy of doxygen that is built in place. I built doxygen 1.8.11 and modified the script to use this release. As of today, the doxygen script is using doxygen 1.8.11.
