

inst-bpm - Bug #9620

Milestone # 9608 (New): Down Converter Test

Data returned by raw character device doesn't make sense

07/14/2015 05:01 PM - John Diamond

Status:	Rejected	Start date:	07/14/2015

Target version:		Spent time:	0.00 hour

Description

The raw character device for adc250x12xsmod returns data that does not seem to be coming from the digitizer. I expect the data to change only when the digitizer is triggered but it appears to return different data each I read the device.

History

- Status changed from New to Rejected

Turned out that rebooting the crate made this problem go away. It was possibly caused by the digitizer being in a bad state.
