

Gratia - Feature #9819

Ensure certificates are being checked by check_mk on each server.

08/13/2015 01:42 PM - Gerard Bernabeu Altayo

Status:	New	Start date:	08/13/2015
Priority:	High	Due date:	08/20/2015
Assignee:	Nicholas Peregonow	% Done:	0%
Category:		Estimated time:	2.00 hours
Target version:		Spent time:	0.00 hour
Description			
<p>We need each GRATIA collector to run a sensor that verifies the certificate presence and validity.</p> <p>This sensor will be reused by other services, the sensor may just need to be readjusted from the current version we have in Zabbix (Developed by Tony).</p> <p>Make sure the whole department is aware of the final sensor so that we do not duplicate effort.</p>
