

## Elog - Bug #9878

### Three Query Timeout

08/23/2015 08:32 AM - Beau Harrison

<b>Status:</b>	Closed	<b>Start date:</b>	08/23/2015
<b>Priority:</b>	Urgent	<b>Due date:</b>	10/01/2015
<b>Assignee:</b>	Kyle Hazelwood	<b>% Done:</b>	0%
<b>Category:</b>	Database	<b>Estimated time:</b>	4.00 hours
<b>Target version:</b>	Version 1.0	<b>Spent time:</b>	0.00 hour
<b>Description</b>			
When forming a search including a USER, CATEGORY, and LOG the browser loads for a long timeout before displaying a "Proxy Error" reporting "The machine serving page you requested is currently not available." I've tried to replicate this in other ways but it only seems to happen when USER, CATEGORY, and LOG are requested.			

#### History

##### #1 - 08/23/2015 10:42 AM - Kyle Hazelwood

- Due date set to 10/01/2015
- Category set to Database
- Status changed from New to Assigned
- Assignee set to Kyle Hazelwood
- Priority changed from High to Urgent
- Estimated time set to 4.00 h

I was able to re-create the problem. The user selection seems to be the big hold up. The db query has been re-written for the new elog version so perhaps this won't be an issue in a couple weeks. Thanks for the heads up, I'll look into this further.

##### #2 - 11/22/2016 07:22 PM - Kyle Hazelwood

- Status changed from Assigned to Closed
- Target version set to Version 1.0

Hopefully the new version has fixed this as the db queries are completely different.
