NOvA Operations	NOvA Operations																												
DCM stops reporting to Run Control	New																												
DCM Timing Chain Related Issue	New																												
Control Room Network Switch Needs Proper (...)	New																												
DCS Voltage Display needs error on unable (...)	New																												
Run Control Status request rate changed	New																												
dcm-3-01-02 = dmc-08, often fails on Detach (...)	New																												
Nearline checklist - noise event limit	New																												
OnMon AR detector block mapping	New																												
VNC crontabs for startup and tickets	New																												
Data Logger / RC communication: Subruns skipped (...)	New																												
Data Logger: crash at run rollover	New																												
Downtime Logger: Reports and report-generating (...)	New																												
DDT metric memory leakage	New																												
Multipoint Connections for ROC-West using (...)	New																												
Shifter / Expert DAQ Goodruns scripts	New																												
Near Detector Module Filling																													
Scintillator fill safety ORC	New																												
Scintillator machine-fill manifold connection	New																												
Shaft pipe-tanker hose connection	New																												
February shift schedule	New																												
NOvA Data Quality																													
Web Pages: storing the web pages in (...)	New																												
Processing: get NDOS OnMon plots set (...)	New																												
Processing: switch cron jobs so that (...)	New																												
Extra: new scripts to make nearline (...)	New																												
Plots: add plane/cell hit rate plots (...)	New																												
Web Pages: Fix the webpage refresh problem.	New																												

Processing: rsync being run by novadaq (...)	New
Plots: Ana webplot updates need to be (...)	New
Plots: Add efficiency plots to the web (...)	New
Plots: make normalized OnMon plots for (...)	New
Plots: use vectors for TGraphs instead (...)	New
Plots: make all 1D plots into rasta (...)	New
Processing: The "find" command takes (...)	New
Plots: make onmon scripts faster by (...)	New
Processing: Clean up files/scripts (...)	New
Plots: archive the 24 hour plots	New
Web Pages: implement displaying of the (...)	New
Plots: add DCM sync plots to the webpage	New
Processing: change the name of the reco (...)	New
Processing: properly reduce network (...)	New
Web Pages & Plots: replace the word (...)	New
Plots: correct X axis on CR plots	New
Plots: make spectra and rasta plot from (...)	New
Plots: make 2 hour versions of the plots	New
Plots: add N pixels with rate > 500 (...)	New
Plots: make % hardware installed / reporting (...)	New
Plots: add track times plots	New
Plots: add slice/track comparison plots	New
Web Pages: move the spill server webpages (...)	New
Plots: add track angle plots	New
Plots: switch all reco detector coordinate (...)	New
Plots: add FEB-rasta style plots for (...)	New
Plots: Fix last run/subrun label	New
Plots: Add blue dot (mean) plot vs (...)	New
Plots: Remove the word "Day" from the (...)	New
Plots: add FEB hit map style plot of (...)	New
Plots: Add "Keep Up" plot	New
Processing: Dealing with NearDet cosmic (...)	New
Processing: Add NEvents and live time (...)	New
Plots: Add better version of NearDet (...)	New

Add info about how often plots are supposed (...)	Assigned
ND nearline day plots empty and nor (...)	New
Adding missing DCMsync plots to website	New
Week DCM plots are not updating correctly	Assigned
NearDet PE plots have incorrect labels	New
